REQUEST FOR QUOTATION (RFQ)  
Date: 04 April 2013

Dear Sir/Madam,

Subject: Request for Quotation for services “Pilot sport fishing program”
Project: 00078317, Integrated Natural Resource Management in the Baikal Basin Transboundary Ecosystem
Case reference: RFQ/EMO/2013-046 (IWC-00078317)

1. The United Nations Office for Project Services (hereinafter “UNOPS”) is pleased to invite you to submit a quotation for supply of the services described in Annex I to this Request for Quotation.

2. We would appreciate receiving your quotation on or before **25 April 2013 10:00 A.M. Irkutsk time** via e-mail DmitriP@unops.org (it must not exceed 8MB) or fax +73012338030 to the attention of Dmitry Popov. Please specify above project and reference number on your quotation.

3. Any requests for clarification should be referred to:
   Contact Person: Dmitry Popov
   Office: UNOPS
   Address: Room: 13, 8, Sakhyanovoy Str., 670047, Buryatia, The Russian Federation
   Telephone: +7 3012 415759
   Fax: +7 3012 338030
   E-Mail: DmitriP@unops.org

4. Your quotation shall include the following:
   - Brief approach and methodology as well as CV(s) of proposed staff/personnel in response to the Terms of Reference as per Annex I.
   - Fixed overall quotation in a single currency (see Annex II) with the following structure:
     - Name(s) of consultant(s)
     - Number of working days and daily fee
     - Daily subsistence allowance
     - Number of international travels and cost
     - Number of local travels and costs
     - Other costs
     - TOTAL
   - Completed Previous Experience Form (see Annex III)

5. UNOPS evaluates the quotations based on best value, i.e. best quality and cost-effectiveness of the proposed offers. The following aspects will be considered for the evaluation:
(a) Suitability of the approach and methodology including firm’s capacity to undertake the services
(b) Qualifications and suitability of the staff/personnel proposed for the assignment including their previous experience with same type of assignment
(c) Cost-effectiveness of price quotation

6. A contract may be awarded to the bidder having submitted the quotation representing the best value for UNOPS. However, UNOPS reserves the right to accept or reject any quotation, and to cancel the process and reject all quotations, at any time prior to the award of contract, without thereby incurring any liability to the Bidders or any obligation to inform the Bidders of the grounds for such action.

7. UNOPS reserves the right to make multiple arrangements for any item or items.

8. In the event of a Contract the UNOPS General Conditions will apply. The conditions are available at http://www.unops.org/english/whatweneed/Pages/Guidelinesforsuppliers.aspx under “UNOPS general conditions of contract”: UNOPS Conditions of Services - For contracts of a value of less than USD 50,000. (Annex IV)

9. **Supplier eligibility.** Suppliers shall not be eligible to submit an offer and to be awarded a contract when at the time of bid submission:
   
   (a) Suppliers are already suspended by UNOPS, or,
   (b) Supplier’s names are mentioned in the UN 1267 list of Terrorists issued by the Security Council resolution 1267, which establishes a sanctions regime to cover individuals and entities associated with Al-Qaida and/or the Taliban, or,
   (c) Suppliers are suspended by the UN Procurement Division (UN/PD), or,
   (d) Suppliers have been declared ineligible by the World Bank.

Furthermore, as a condition of doing business with UNOPS it is necessary that suppliers, their subsidiaries, agents, intermediaries and principals cooperate with the Office of Internal Oversight Services (OIOS) of the United Nations, UNOPS Internal Audit and Investigations Group (IAIG) as well as with other investigations authorized by the Executive Director and with the UNOPS Ethics Officer (during preliminary reviews in line with UNOPS whistle blower policy) as and when required. Such cooperation shall include, but not be limited to, the following: access to all employees, representatives, agents and assignees of the supplier; as well as production of all documents requested, including financial records. Failure to fully cooperate with investigations will be considered sufficient grounds to allow UNOPS to repudiate and terminate the contract, and to debar and remove the supplier from UNOPS’s list of registered suppliers.

10. **Information regarding Bid Protest can be found at:**
    http://www.unops.org/english/whatwedo/services/procurement/Pages/Procurementpolicies.aspx

11. UNOPS strongly encourages all Bidders to subscribe to the Tender Alert Service available on the United Nations Global Market Place (www.ungm.org). This will allow Bidders to be notified automatically of all UNOPS business opportunities for the products and services for
which they have registered. Instructions on how to subscribe to the Tender Alert Service can be found in the UNGM Interactive Guide for Suppliers.

12. UNOPS will effect payment within 30 days after receipt of original payment documentation.

We look forward to receiving your quotation.

Yours sincerely,
Sergey Kudelya
Project Manager

ANNEX I - TERMS OF REFERENCES

Terms of Reference (TOR) for Local Service Contract
Pilot sport fishing program

Location : Russia
Application Deadline : 25-Apr-2013
Type of Contract : Service Contract
Post Level : Local
Languages Required : English, Russian
Starting Date : 30-April-2013
Duration of Initial Contract : 30-April-2013 - 15 November 2013
Expected Duration of Assignment: 7 months

Background:
The project’s objective is to spearhead integrated natural resource management of Baikal Lake Basin and Hövsgöl Lake ensuring ecosystem resilience, reduced water quality threats in the context of sustainable economic development. The project has three primary components: elaborating a strategic policy and planning framework; strengthening institutional capacity for IWRM; and demonstrating water quality and biodiversity mainstreaming practice, including groundwater monitoring and protection.

This project builds upon a solid, decades-old baseline of bilateral cooperation between Russia and Mongolia on the transboundary waters of the Selenga River and by extension the Baikal Basin itself. To date, international support for environmental conservation and management in the Baikal Basin has not been transboundary in orientation; little support has been provided the two countries in strengthening their transboundary cooperation to manage sustainably the globally significant environmental benefits represented by the incomparable Lake Baikal and its transboundary Basin, at the top of which lies Mongolia’s aquatic jewel, Lake Hovsgol. In addition to this solid baseline of transboundary cooperation are two rapidly growing economic baselines in mining and tourism, with mining being the biggest and fastest growing economic activity in the Baikal Basin and tourism a smaller but also rapidly growing sector in both the Russian and Mongolian portions of the Baikal Basin. Both of these sectors hold much promise in becoming better stewards of the Baikal Basin’s aquatic ecosystems. In the absence of a GEF investment, these barriers are likely to continue hampering an effective transboundary response to the critical threats that are already impacting the ecosystem health and resilience of the Baikal Basin.

Successful implementation of a regional project like “Integrated Natural Resource Management in the Baikal Basin Transboundary Ecosystem”, to a large degree depends on effective implementation and ownership of project-inspired work at the national and local levels.

Justification of consultancy:

Lake Baikal and its transboundary basin including Lake Hovsgol represent an unparalleled global benefit in terms of international waters and biodiversity values. While past and current
efforts to protect and sustainably utilize the environment and its natural resources are impressive, they are insufficient to the task of addressing the threats to the health of the Baikal Basin’s interconnected aquatic ecosystems. These threats include: climate change, pollution and sedimentation, nutrient loading, and habitat destruction. To address these threats successfully conservation work must move beyond the protected area limits and into the 87% of the Basin that is not protected where natural resource exploitation continues without regard to ecosystem health and biodiversity conservation objectives. Significant barriers hamper both countries’ ability to move ahead both within their national envelopes and jointly on a robust transboundary level. These barriers include: policy and regulatory gaps, institutional weaknesses, poor utilization of BAT/BEP relevant to key issues facing the Basin, and low levels of awareness of transboundary BB issues.

Overall, the basic legal and policy frameworks for the conservation and sustainable management of the Baikal Basin are in place. From a transboundary perspective, lacking are specific laws or policies enabling the transboundary monitoring of aquatic ecosystem health both in Russia and Mongolia. The regulatory basis for ecosystem conservation and water-pollution prevention in Baikal has not yet been completed. For example, the regulatory and policy mechanisms needed to implement a SAP, as well as sub-basin watershed management plans are as yet uncertain. Several scientific components for SAP development and implementation remain yet to be completed, particularly with regard to the extent of groundwater / surface water interconnectivity in the region, especially along the Selenga River; and accumulation of persistent organic pollutants in the benthic sediments and biota of the Basin’s rivers, deltas and lakes. Neither Russian or Mongolian law adequately stipulates clear and practical environmental quality standards for ground water and surface water. The two are inextricably linked in most river systems. The picture of water quality threats from industrial and mining sites remains incomplete; and measures on how best to handle residual pollution problems from abandoned mining sites have not been defined in policies on either side of the border. EIA procedures do not properly address biodiversity risks; and sectoral programs are operating without standards for minimization or reduction of impacts to biodiversity. Tourism laws and policies focus more upon the economic aspects of tourism development and promotion and give short shrift to detailing guidelines and training on mainstreaming biodiversity and ecosystem health management objectives into tourism planning and management practices, including utilizing new tools such as certification incentives for environmentally sustainable behavior by tourism operators.

None of the existing bodies set up at bilateral and national levels (the Joint Task Force, and the Baikal Commission in Russia) have the authority, budget and cooperative framework necessary to reduce threats / barriers to water quality and biodiversity objectives.

The EIA process does not adequately address biodiversity conservation considerations. Even though Russia has established national procedures for assessing environmental impacts of economic projects, or any other activity that may have direct or indirect impacts on the environment, and biodiversity is an obligatory part of EIA content, there are still some barriers to fully integrating biodiversity conservation considerations into all phases of mining and tourism sector investment projects.

Obstacles to capacity building among involved stakeholders relates in part to peculiarities of public “environmental” awareness in the region.

Development objective:
The “normal” way of sport fishing in much of the world is to “catch and kill.” To fish means to kill fish. This is problematic even with oceanic sport fisheries and especially so when it comes to maintaining healthy sustainable populations of sport fish in river systems like those in the Baikal Basin. Populations of the more desirable (and ecologically significant) larger fish are quickly reduced using “catch and kill” approaches. This has been the result in a significant portion of the Baikal Basin, where populations of taimen, lennok and grayling have plummeted, in some cases perhaps beyond the tipping point making natural recovery difficult and modifying the ecological balance of the river.

In the Mongolia’s Baikal Basin, however, there is at least one ongoing successful experience with sustainable “catch and release” sport fishing, that brings fishing clients to remote stretches of river to catch and release the legendary taimen. The program has been supported by solid field science, which has studied the ecology of taimen for several years, using various radio, satellite, and acoustic tracking technologies, shedding light on the impact of “catch and release” fishing on numbers and movement of the fish populations up and down the river, spawning times, diet, and age structure. The fishers themselves are involved in recording information on the fish they catch and release. Local communities also benefit and work is ongoing to form a more formal agreement between the fishing company and the local communities.

Peer-to-peer training will be central to this pilot. At least one successful “catch and release” operation will be used as a training base for tourism policy makers, fisheries enforcement officers, and sport fishing guides and operators from both countries. Organized groups of sport fishing guides will be trained in the basic tenets of low-impact, catch and release fishing using either fly fishing or lure fishing techniques. Proper catch and release fish handling techniques will be demonstrated. And work under this pilot will establish an association of catch and release fishing guides working in the Baikal Basin to facilitate policy engagement and ongoing capacity building and support programs.

Immediate objective(s):

Work under Output 3.3.: “Pilots for mainstreaming biodiversity and ecosystem health management objectives into tourism planning and practice” service will develop a pilot/model sport fishing program on low-impact, sensitive sport fishing tourism in the Baikal Basin.

Specific Deliverables:

The service is expected to deliver the following results:

- Develop a pilot/model sport fishing program “catch and release” for the Baikal Basin and present it to the Project Manager for endorsement.
- Publish endorsed model sport fishing program in Russian (100 copies).
- Organize a program implementation (model fishing) within the developed model conception with a wide presentation in public media and participation of well know persons.

Expected Outputs, reports and related logistics:

- Detailed calendar plan for activities to be carried out within the framework of the consultancy at the end of first 15 days;
- The pilot/model sport fishing program.
• The program implementation report with a list of links and media sources published information about this event.
• Multimedia materials made within the framework of the consultancy (photo of program implementation event, fishing sites, fishing equipment and etc.)

Payment will be made in 3 installments based on the acceptance of the required deliverables by the Project Manager as specified below:

• 10% payment as a first installment upon the submission of detailed calendar plan at the end of first 15 days;
• 40% remaining payment upon submission of the pilot/model sport fishing program – no later than by 30 June 2013.
• 40% remaining payment upon submission of the program implementation report – no later than by 31 Aug 2013.

**Budget**: An indicative cost of USD 7,000 has been estimated for these services.
Приблизительный перевод на русский язык:

Конкретные результаты:
Ожидается следующие результаты выполнения работ:

- Разработать пилотную/модельную программу спортивного рыболовства «поймал и отпустил» для бассейна озера Байкал и представить ее на утверждение руководителю проекта;
- Опубликовать (в печатном виде) разработанную и утвержденную модель спортивного рыболовства на русском языке (100 копий);
- Организовать программу реализации (модель рыболовства) в пределах разработанной концепции с широким освещение в средствах массовой информации и участием известных личностей;

Ожидаемые отчеты и сроки:

- Детализированный календарный план деятельности в рамках контракта (в течение 15 дней);
- Программа пилотного/модельного спортивного рыболовства;
- Отчет о реализации программы со списком ссылок на средства массовой информации с публикациями о событии;
- Мультимедиа-материалы, сделанные в рамках работ (фото событий реализации программы, места рыбалки, рыболовное снаряжение и т.п.)

Платеж будет осуществлен 3 частями на основе принятия руководителем проекта требуемых отчетов в соответствии со следующим графиком:

- 10 % – на основании предоставления календарного плана деятельности к концу первых 15 дней;
- 40 % – на основании предоставления программы пилотного/модельного рыболовства – не позднее, чем 30 июня 2013;
- 40% – по предоставлению отчета о реализации программы – не позднее, чем 31 августа 2013

ANNEX IV - UNOPS CONDITIONS OF SERVICES

1-Contractor’s Status  In all matters relating to this Contract, the Contractor shall be acting as an independent contractor. Neither the Contractor nor its employees are the employees of UNOPS. The Contractor assumes all liabilities or obligations imposed by any law or regulation with respect to such employees. The Contractor shall not have the authority to create any obligation on behalf of UNOPS and shall not represent itself as an agent, employee or in any other capacity of UNOPS. The Contractor shall be responsible for the professional and technical competence of its employees, who shall be expected to respect local customs and conform to a high standard of moral and ethical conduct.

2-Damage to Persons and Property  The Contractor shall indemnify and hold harmless UNOPS, its officers, agents, employees and servants from and against all suits, claims, demands, proceedings, and liability of any nature or kind, including costs and expenses, for injuries or damages to any person or any property whatsoever which may arise out of or in consequence of acts or omissions of the Contractor or its agents, employees, servants or subcontractors in the execution of this Contract.

3-Intellectual Property Rights  All intellectual property and other proprietary rights, including but not limited to patents, copyrights and trademarks, in all countries, with regard to maps, drawings, photographs, mosaics, plans, manuscripts, records, reports, recommendations, estimates, documents and other materials, except pre-existing materials, publicly or privately owned, collected or prepared as a consequence of or in the course of the performance of this Contract, shall become the sole property of UNOPS. The Contractor shall hold harmless and fully indemnify UNOPS from and against all claims and proceedings for infringement of any patent rights, design trademark or name or other protected rights resulting from Contractor’s performance.

4-Confidentiality  All maps, drawings, plans, reports, documents and all other data compiled by or received by the Contractor under the Contract shall be the property of UNOPS, shall be treated as confidential and shall be delivered only to the duly authorized representative of UNOPS upon completion of the Services.

5-Advertising  The Contractor shall not advertise or otherwise make public the fact that it is performing, or has performed services for UNOPS or use the name, emblem or official seal of UNOPS or the United Nations or any abbreviation of the name of UNOPS or the United Nations for advertising purposes or any other purposes.

6-Modifications  Any modification or change to this Contract shall require an amendment in writing between both parties duly signed by the authorized representatives of the Contractor and UNOPS.

7-Sub-contracting and Assignment of Contract  The Contractor shall not sub-contract the Services or otherwise assign, transfer, pledge or make other disposition of this Contract or any part thereof or of any of the Contractor's rights, claims or obligations under this Contract.

8-Termination  UNOPS may terminate this Contract for cause or convenience in the interest of the UNOPS upon not less than fourteen (14) days written notice to the Contractor. Upon termination of this Contract, the Contractor shall take immediate steps to terminate his performance of the Contract in a prompt and orderly manner and to reduce losses and to keep further expenditures to a minimum. Unless such termination has been occasioned by the Contractor's breach of this Contract, the Contractor shall be entitled to be paid for the part of the Services satisfactorily completed as of the date of termination, plus substantiated costs resulting from commitments entered into prior to the date of termination as well as any reasonable substantiated direct costs incurred by the Contractor as a result of the termination, but shall not be entitled to receive any other or further payment or damages.

9-Privileges and Immunities  Nothing in or relating to this Contract shall be deemed a waiver of any of the privileges and immunities of the United Nations of which the UNOPS is an integral part.

10-Settlement of Disputes  Any controversy or claim arising out of or in connection with provision of this Contract or any breach thereof, shall, unless resolved through direct negotiation, be settled in accordance with the UNCITRAL Arbitration Rules then in force. UNOPS and the Contractor shall be bound by any arbitration award rendered as a result of such arbitration as the final adjudication of any such controversy or claim.
