ANNEX I - TERMS OF REFERENCES

“Organization of the Project Steering Committee Meeting and Strategic Action Programme Team participants meeting;

Starting Date: (date when the selected candidate is expected to start) 01 June -2014

Expected Duration of Assignment 3 months

Background:
The project’s objective is to spearhead integrated natural resource management of Baikal Lake Basin and Hövsgöl Lake ensuring ecosystem resilience, reduced water quality threats in the context of sustainable economic development. The project has three primary components: elaborating a strategic policy and planning framework; strengthening institutional capacity for IWRM; and demonstrating water quality and biodiversity mainstreaming practice, including groundwater monitoring and protection. This project builds upon a solid, decades-old baseline of bilateral cooperation between Russia and Mongolia on the transboundary waters of the Selenga River and by extension the Baikal Basin itself. To date, international support for environmental conservation and management in the Baikal Basin has not been transboundary in orientation; little support has been provided the two countries in strengthening their transboundary cooperation to manage sustainably the globally significant environmental benefits represented by the incomparable Lake Baikal and its transboundary Basin, at the top of which lies Mongolia’s aquatic jewel, Lake Hovsgol. In addition to this solid baseline of transboundary cooperation are two rapidly growing economic baselines in mining and tourism, with mining being the biggest and fastest growing economic activity in the Baikal Basin and tourism a smaller but also rapidly growing sector in both the Russian and Mongolian portions of the Baikal Basin. Both of these sectors hold much promise in becoming better stewards of the Baikal Basin’s aquatic ecosystems. In the absence of a GEF investment, these barriers are likely to continue hampering an effective transboundary response to the critical threats that are already impacting the ecosystem health and resilience of the Baikal Basin. Successful implementation of a regional project like “Integrated Natural Resource Management in the Baikal Basin Transboundary Ecosystem”, to a large degree depends on effective implementation and ownership of project-inspired work at the national and local levels.

Justification of consultancy:
The project will be guided by a Project Board/Steering Committee (SC) comprised of the representatives of both countries, UNDP, UNOPS and other donors and partners. On the Russian side, the SC will include representation from the Baikalvodresurs, MNRE, Ministry of Sport,
Tourism and Youth Policy and representatives of Republic of Buryatia, Irkutsk Oblast and Zabaikalsky Krai. On the Mongolian side, the SC will include representation from the MNET, the Water Authority of Mongolia, Ministry of Mineral Resources and Energy, and one Aimag. The SC will provide guidance based upon project progress assessments and related recommendations from the PMU. The SC will review and approve annual project reviews and workplans, technical documents, budgets and financial reports. The SC will provide general strategic and implementation guidance to the PMU. It will meet annually, and make decisions by consensus. The specific rules and procedures of the SC will be decided upon at the project inception meeting.

**Development objective:**

*Project Board/Steering Committee* is responsible for making management decisions for a project in particular when guidance is required by the Project Manager. The Project Board plays a critical role in project monitoring and evaluations by quality assuring these processes and products, and using evaluations for performance improvement, accountability and learning. It ensures that required resources are committed and arbitrates on any conflicts within the project or negotiates a solution to any problems with external bodies. In addition, it approves the appointment and responsibilities of the Project Manager and any delegation of its Project Assurance responsibilities. Based on the approved Annual Work Plan, the Project Board can also consider and approve the quarterly plans (if applicable) and also approve any essential deviations from the original plans.

In order to ensure UNDP’s ultimate accountability for the project results, Project Board decisions will be made in accordance to standards that shall ensure management for development results, best value money, fairness, integrity, transparency and effective international competition. In case consensus cannot be reached within the Board, the final decision shall rest with the UNDP Project Manager.

*Strategic Action Programme* is being developed for shared actions by the Russian Federation and Mongolia. This SAP effort builds upon lessons learned by more than 30 GEF TDA/SAP projects, with special attention to TDA/SAP projects such as the Danube and Dnipro Rivers, Lake Ohrid, and Caspian. Building from other TDA/SAP efforts, the Baikal Basin effort emphasizes mainstreaming biodiversity management objectives into economic sector policies and practices, to facilitate the maintenance of essential aquatic ecosystem functions that sustain human welfare. This TDA/SAP provides a holistic review and strategy development for the transboundary basin-wide ecosystem.

The SAP builds from the TDA results and will be completed, approved and under implementation by the final year of the project. The SAP constitutes a binding agreement between the two countries. It identifies goals for ecosystem protection and include milestones and indicators for attainment of the goals. In order to achieve the jointly-agreed goals, both countries will be expected to develop biodiversity conservation standards for tourism, mining, fisheries and to implement sub-basin watershed management plans that incorporate water quality and biodiversity objectives.

*The environmental conference.* According to the Regulations of the Federal Service for Supervision of Natural Resources, one of its main functions is state regulation in the area of Lake Baikal. The problem of Lake Baikal preservation is currently central, because the Lake is unique the largest freshwater reservoir in the world.

The Russian Federation has a great responsibility for preservation of this unique natural site, the more especially as the Lake is included in UNESCO List of World Natural Heritage sites.
The purpose of this conference is to bring together the efforts of scientists and experts of the two countries in environmental issues and in rational use of natural resources scope (especially in the Lake Baikal basin), creating a platform for the development of uniform solutions for pressing environmental challenges and rational use of natural resources.

Организация Заседания Управляющего комитета проекта и Совещания по Стратегической
Программе действий;
Проведение Международной научно-практической конференции по вопросам охраны
окружающей среды с участием природоохранного сообщества
Байкальского региона и Монголии»

Обоснование.

**Руководящий комитет/совет проекта** несет ответственность за принятие
управленческих решений по проекту, в частности, когда руководителю проекта требуется
направление. Совет проекта играет важную роль в ходе мониторинга и оценки проекта,
obеспечивая качество этих процессов и их результатов, используя оценки для
совершенствования процесса выполнения, отчетности и обучения. Он обеспечивает, что
требуемые ресурсы предоставлены, и разрешает любые споры в рамках проекта или
проводит переговоры для поиска решений любых проблем с внешними органами. В
дополнение, он одобряет назначение руководителя проекта и круг его полномочий, а
также любое делегирование его полномочий по обеспечению проекта. На основе
одобренного ежегодного плана работ Совет проекта может также рассмотреть и одобрить
квартальные планы (при необходимости), и может одобрить любые существенные
отклонения от оригинальных планов.

С целью обеспечения предельной ответственности ПРООН за результаты проекта,
решения Совета проекта будут приниматься в соответствии со стандартами, которые
обеспечивают такое управление, которое направлено на проработку результатов,
optимальное расходование средств, беспристрастность, комплексность, прозрачность и
эффективную международную конкуренцию. В случае, если консенсус не может быть
dостигнут в рамках Совета, окончательное решение будет приниматься руководителем
проекта со стороны ПРООН.

**Стратегическая программа действий**. В ходе работы по данному результату
будет сформирована подробная Стратегическая программа действий (СПД) для
совместных действий Российской Федерации и Монголии. Такие усилия, связанные СПД,
будут строиться на опыте, полученном в результате свыше 30 проектов ГЭФ,
предусматривавших СПД, с особым вниманием таким проектам, как по рекам Дунай и
Днепр, озеру Охрид и Каспию. Основываясь на усилиях по подготовке других СПД, в
случае бассейна Байкала усилия акцентируют включение целей управления
биоразнообразием в политики и практики экономических отраслей для содействия
поддержанию основных функций водной экосистемы, которые поддерживают
благополучие человека. Настоящая СПД предоставит целостное рассмотрение и
разработку стратегии для трансграничной бассейновой экосистемы.

СПД будет основываться на результатах трансграничного диагностического
анализа, он будет одобрен и его реализация будет начата в ходе последнего года проекта.
СПД составит связывающее соглашение между обеими странами. Он определит цели для
охраны экосистемы и будет включать этапы и индикаторы для их достижения.
Ожидается, что обе страны для достижения этих совместно согласованных целей должны
будут разработать стандарты сохранения биоразнообразия для тузима, горнодобычи,
рыболовства, и будут реализовывать планы управления водосборными суб(под)-
bассейнами, которые инкорпорируют цели в области биоразнообразия и качества воды.

Конференция по вопросам охраны окружающей среды. Согласно Положению о Федеральной службе по надзору в сфере природопользования одной из ее основных функций является осуществление государственного регулирования в области охраны озера Байкал, проблема сохранения которого в силу его уникальности и ценности как крупнейшего на земле резервуара пресной воды носит в настоящий момент актуальный характер. Внесение озера Байкал в список участников всемирного природного наследия ЮНЕСКО накладывает на Российскую Сторону дополнительную ответственность за обеспечение сохранности этого уникального природного объекта. Целью данной Конференции является объединение усилий ученых и специалистов двух государств в вопросах охраны и рационального использования природных ресурсов, особенно в бассейне озера Байкал, создание платформы для выработки единых механизмов решений актуальных проблем охраны окружающей среды и рационального природопользования.
